

A-Tech Wet

Hydrophobic Urethane Foam Grout

A-Tech Wet is a hydrophobic urethane foam grout used to stop water leaks in concrete cracks. The product reacts with water to form an expanding foam. This foam completely fills the defective area. After reacting, the finished foam is a non-shrinking, flexible closed cell foam that prevents water penetration.

A-Tech Wet is a two component urethane grout packaged in a dual cartridge. The components mix 1:1 prior to injection into the defective crack.

A-Tech Wet is used in conjunction Applied Technologies Surface Pastes, Injection Ports and Static Mixers.

Benefits:

- Stops water leaks
- Completely fills the concrete crack
- Non-shrinking final product
- Re-use remaining material
- Expands up to 30x volume
- Strong adhesion to concrete

Size: 300cc x 300 cc cartridge
6/Box

Use with ¼ x 24 element static mixer

Where to Use:

- Concrete wall cracks
- Pipe intrusions
- Honeycombs
