Re: **Meet ACI 440.3R-04**
Rhino Basement Wall Reinforcement System

This letter is to confirm that it is my opinion that the Rhino Basement Wall fiber reinforcement polymer (FRP) system shall meet or exceed the test methods presented in American Concrete Institute's guidelines as described in ACI 440.3R-04. This system consists of carbon fiber-reinforced polymer (CFRP) along with attachments at top and bottom of the FRP tendon

If you have any questions or concerns, please feel free to contact me.

Sincerely,

Frederick J. Sambor, P.E.
Professional Engineer
