

Peel Paste

Removable Surface Seal and Port Adhesive

Peel Paste is a 100% solids, two component, solvent free polyurea based product. It is used to adhere surface injection ports and to seal the crack surface prior to injection. Peel Paste is easily removed from the concrete substrate after the injected materials have cured.

Peel Paste is used in conjunction with Applied Technologies Injection Ports and crack injection epoxies and urethanes.

Benefits:

- Easily removed after injection
- Low odor

Where to Use:

- Adhere injection ports
- Sealing of crack surface

Sizes: 300cc x 300 cc cartridge
6/Box

Limitations:

- Not recommended for use with high injection pressures

Color: Grey (mixed)
