

POXY PASTE

POXY PASTE is a two component, solvent free epoxy adhesive. It is a very rapid curing sealer for efficient pressure injection of cracks.

WHERE TO USE:

Use to seal cracks and attach surface ports for pressure injection of cracks.

ADVANTAGES:

Poxy Paste has a very rapid cure time for quick application of cracks. Injection can proceed as soon as ½ hour after application.

Application:

Apply ¼" thick x 2" wide strip over the cracks to seal them prior to injection. Apply ¼" bead to the bottom of surface injection ports.

Packaging:

300 cc x 300 cc cartridge.

PHYSICAL DATA:

Color: Concrete gray
Pot-Life: 6-10 minutes
Mixing ratio 1:1
Tack free time: @ 73° F 25-30 minutes

Compressive Strength (ASTM D-695)	9,200 psi @ 7 days
Tensile Strength (ASTM D-790)	3,300 psi
Shear Properties (ASTMD-732)	2,500 psi
